

# Memo

To: Mayor Russell and Council Members

From: Mark Latham, City Planner

Date: August 29, 2024

Subject: Approval of Contract with CK Engineering for Fletcher

Attached is a contract with CK Engineering to complete the design and construction of Fletcher from Barrington to Klenc. The first task is to complete the schematic drawing which includes: property and topographic surveying, geotechnical, and environmental. The cost for Task One is property identification is \$90,000.

The 10-year CIP identified Fletcher as top priority for new street construction.

I selected CK Engineering based on my experience working with Zak Johnston and he is very familiar with the project.

I am asking the Council to approve the contract with CK Engineering for design and construction of Fletcher.
